5-V Dual Differential PECL Buffer-to-TTL Translator

FEATURES

- **Dual 5-V Differential PECL-to-TTL Buffer**
- **24-mA TTL Ouputs**
- **Operating Range**
  - **PECL V_{CC} = 4.75 V to 5.25 V with GND = 0 V**
- **Support for Clock Frequencies of 250 MHz (TYP)**
- **3.5-ns Typical Propagation Delay**
- **Output Default Low with Inputs Left Open or <1.3 V**
- **Internal Input 50-kΩ Pull-Down Resistor**
- **Built-In Temperature Compensation**
- **Drop-In Compatible to the MC100ELT23**

APPLICATIONS

- **Data and Clock Transmission Over Backplane**
- **Signaling Level Conversion for Clock or Data**

DESCRIPTION

The SN65ELT23 is a low power dual PECL-to-TTL translator device. The device includes circuitry to maintain a known logic low level when inputs are in an open condition. The SN65ELT23 is housed in an industry standard SOIC-8 package and is also available in an optional TSSOP-8 package.
PIN ASSIGNMENT

D or DGK PACKAGE
(TOP VIEW)

Table 1. Pin Descriptions

PIN	FUNCTION
D_0, $\overline{D}_0$, D_1, $\overline{D}_1$	PECL inputs
Q_0, Q_1	TTL outputs
V_{CC}	Positive supply
GND	Ground

ORDERING INFORMATION[1][2]

PART NUMBER	PART MARKING	PACKAGE	LEAD FINISH
SN65ELT23D	ELT23	SOIC	NiPdAu
SN65ELT23DGK	SIKI	MSOP	NiPdAu

(1) For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI web site at www.ti.com.
(2) Leaded device options are not initially available; contact a sales representative for further details.

⚠️ Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

ABSOLUTE MAXIMUM RATINGS[1]

PARAMETER	CONDITIONS	VALUE	UNIT
Absolute supply voltage, V_{CC}		6	V
Absolute input voltage, V_I	GND = 0 and $V_I \leq V_{CC}$	0 to 6	V
Output current	Continuous	50	mA
	Surge	100	
Operating temperature range		−40 to 85	°C
Storage temperature range		−65 to 150	°C

(1)   Stresses beyond those listed under absolute maximum ratings may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any conditions beyond those indicated under recommended operating conditions is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

DISSIPATION RATINGS

PACKAGE	CIRCUIT BOARD MODEL	POWER RATING $T_A < 25°C$ (mW)	THERMAL RESISTANCE, JUNCTION-TO-AMBIENT NO AIRFLOW	DERATING FACTOR $T_A > 25°C$ (mW/°C)	POWER RATING $T_A = 85°C$ (mW)
SOIC	Low-K	719	139	7	288
	High-K	840	119	8	336
MSOP	Low-K	469	213	5	188
	High-K	527	189	5	211

THERMAL CHARACTERISTICS

over operating free-air temperature range (unless otherwise noted)

PARAMETER			MIN	TYP	MAX	UNIT
θ_{JB}	Junction-to-board thermal resistance	SOIC		79		°C/W
		MSOP		120		
θ_{JC}	Junction-to-case thermal resistance	SOIC		98		°C/W
		MSOP		74		

KEY ATTRIBUTES

CHARACTERISTICS	PARAMETER	VALUE
Moisture sensitivity level		Level 1
Flammability rating (oxygen index: 28 to 34)		UL 94 V-0 at 0.125 in
Internal pull down resistor		50 KΩ
Electrostatic discharge	Human body model	2 KV
	Charged-device model	1.5 KV
	Machine model	200 V
Meets or exceeds JEDEC Spec EIA/JESD78 latchup test		

Product Folder Link(s): *SN65ELT23*

PECL INPUT DC CHARACTERISTICS

At V_{CC} = 5.0 V, GND = 0.0 V (unless otherwise noted)[1][2]

PARAMETER		TEST CONDITIONS	T_A = −40°C			T_A = 25°C			T_A = 85°C			UNIT
			MIN	TYP	MAX	MIN	TYP	MAX	MIN	TYP	MAX	
V_{IH}	High-level input voltage, single-ended	See [3]	3835		4120	3835		4120	3835		4120	mV
V_{IL}	Low-level input voltage, single-ended		3190	2280	3525	3190	2280	3525	3190	2280	3525	mV
V_{IHCMR}	High-level input voltage common-mode range, differential	See [4]	2.2		5.0	2.2		5.0	2.2		5.0	V
I_{IH}	High-level input current				255			175			175	μA
I_{IL}	Low-level input current		0.5			0.5			0.5			μA

(1) The device meets the specifications after thermal balance has been established when mounted in a socket or printed circuit board with maintained transverse airflow greater than 500 lfpm. Electrical parameters are assured only over the declared operating temperature range. Functional operation of the device exceeding these conditions is not implied. Device specification limit values are applied individually under normal operating conditions and not valid simultaneously.
(2) Input and output parameters vary 1:1 with V_{CC}. V_{CC} can vary ±0.25 V.
(3) TTL output R_L = 500 Ω to GND
(4) $V_{IHCMR(min)}$ varies 1:1 with GND, $V_{IHCMR(max)}$ varies 1:1 with V_{CC}.

TTL OUTPUT DC CHARACTERISTICS

At V_{CC} = 4.75 V to 5.25 V, T_A = −40°C to 85°C (unles otherwiase noted)[1]

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
I_{CCH}	Power supply current			20	25	mA
I_{CCL}	Power supply current			21	27	mA
I_{OS}	Output short circuit current		−150		−50	mA
V_{OH}	High-level output voltage [2]	I_{OH} = −3.0 mA	2.4		V_{CC} − 0.7V	V
V_{OL}	Low-level output voltage	I_{OL} = 24 mA			0.5	V

(1) The device meets the specifications after thermal balance has been established when mounted in a socket or printed circuit board with maintained transverse airflow greater than 500 lfpm. Electrical parameters are assured only over the declared operating temperature range. Functional operation of the device exceeding these conditions is not implied. Device specification limit values are applied individually under normal operating conditions and not valid simultaneously.
(2) Max level is assured by design

AC CHARACTERISTICS

At V_{CC} = 5.0 V, GND = 0.0 V (unless otherwise noted)[1][2][3]

PARAMETER		TEST CONDITIONS	T_A = −40°C			T_A = 25°C			T_A = 85°C			UNIT
			MIN	TYP	MAX	MIN	TYP	MAX	MIN	TYP	MAX	
f_{MAX}	Max switching frequency	at Vol < 0.5V and Voh > 2.4V (see Figure 5)		250			250			250		MHz
t_{PLH}/t_{PHL}	Propagation delay times to output	At 1.5 V	2.0	3.5	5.0	2.0	3.7	5.0	2.0	3.9	5.0	ns
t_{JITTER}	Random clock jitter (RMS)			4.1	10		3.7	10		3.7	10	ps
V_{PP}	Input voltage swing [4]		200		1000	200		1000	200		1000	mV
t_r/t_f	Output rise times (10%–90%)		1.0	1.7	3.0	1.0	1.8	3.0	1.0	1.9	3.0	ns
	Output fall times (10%–90%)		0.5	1.0	1.6	0.5	1.1	1.6	0.5	1.3	1.6	

(1) The device meets the specifications after thermal balance has been established when mounted in a socket or printed circuit board with maintained transverse airflow greater than 500 lfpm. Electrical parameters are assured only over the declared operating temperature range. Functional operation of the device exceeding these conditions is not implied. Device specification limit values are applied individually under normal operating conditions and not valid simultaneously.
(2) V_{CC} can vary ±0.25 V.
(3) TTL output R_L = 500 Ω to GND and C_L = 20 pF to GND, see Figure 1.
(4) $V_{PP(min)}$ is the minimum input swing for which AC parameters are assured.

PACKAGING INFORMATION

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/ Ball Finish	MSL Peak Temp (3)	Samples (Requires Login)
SN65ELT23D	ACTIVE	SOIC	D	8	75	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-1-260C-UNLIM	
SN65ELT23DGK	ACTIVE	VSSOP	DGK	8	80	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-1-260C-UNLIM	
SN65ELT23DGKR	ACTIVE	VSSOP	DGK	8	2500	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-1-260C-UNLIM	
SN65ELT23DR	ACTIVE	SOIC	D	8	2500	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-1-260C-UNLIM	

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46C and to discontinue any product or service per JESD48B. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have *not* been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components which meet ISO/TS16949 requirements, mainly for automotive use. Components which have not been so designated are neither designed nor intended for automotive use; and TI will not be responsible for any failure of such components to meet such requirements.
